NEXT LEVEL WATER SLIDE EXPERIENCES

# iSlide, Next Level Water Slide Experiences

You're constantly looking for new experiences. Exceeding customer expectations. Creating memories that last. iSlide is the world's leading company in adding interactive experiences to water slides. We design and implement superior interactive technology that take your slides to the next level.

## WELCOME TO ISLIDE

### **Our vision:**

To become the world's favourite partner for developing interactive experiences in water slides.

### **Our mission:**

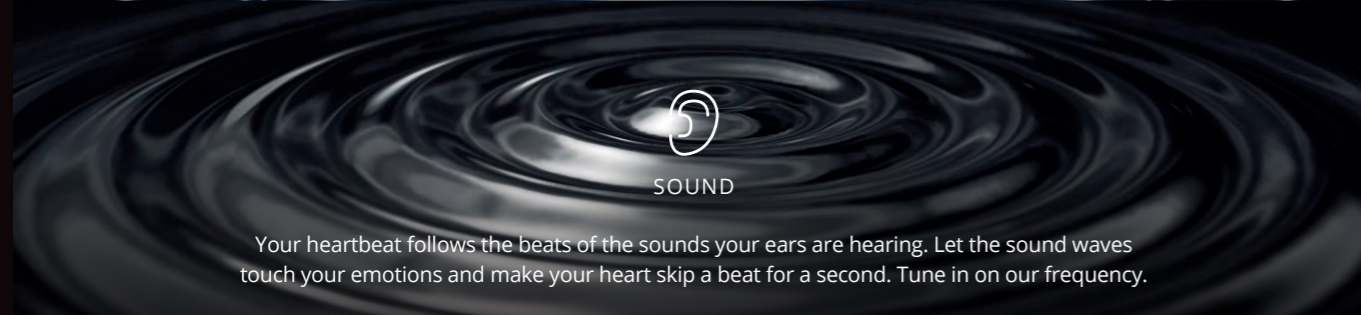

To develop superior interactive technology that lifts the experience in water slides to the next level.

DISCOVER HOW WE CAN TICKLE YOUR SENSES.

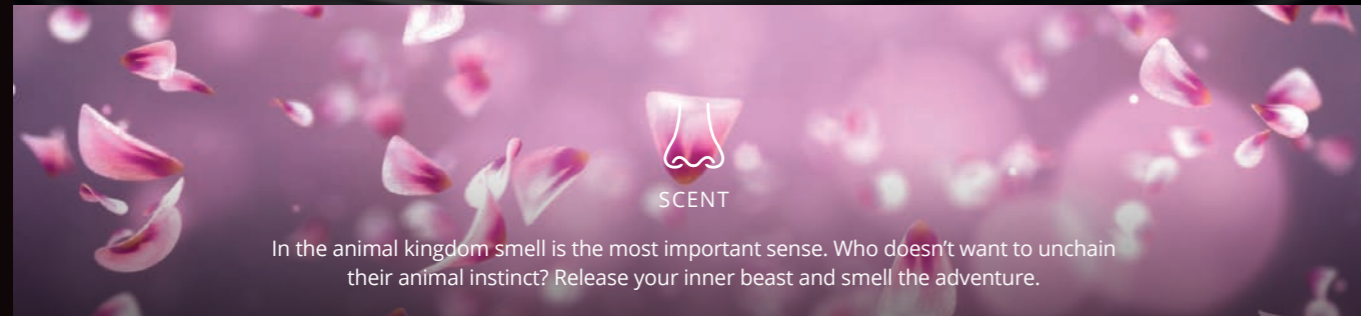

LIGHT

With your eyes open you can't avoid the power of light. The combination of colors and their intensity will take you to another undiscovered world. Beyond all limits.

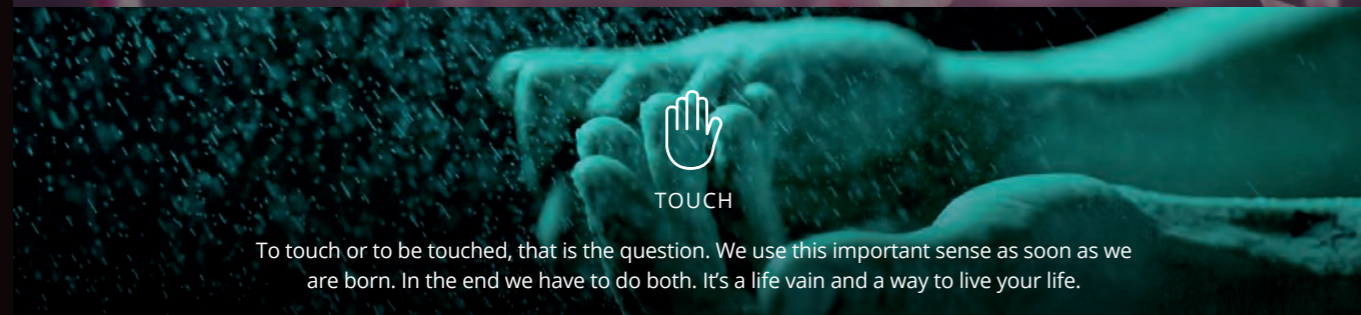

SOUND

Your heartbeat follows the beats of the sounds your ears are hearing. Let the sound waves touch your emotions and make your heart skip a beat for a second. Tune in on our frequency.

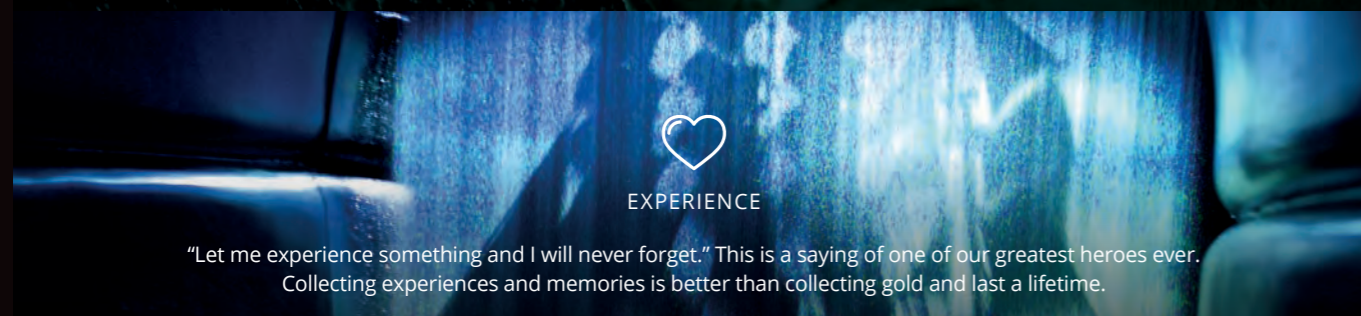

SCENT

In the animal kingdom smell is the most important sense. Who doesn't want to unchain their animal instinct? Release your inner beast and smell the adventure.

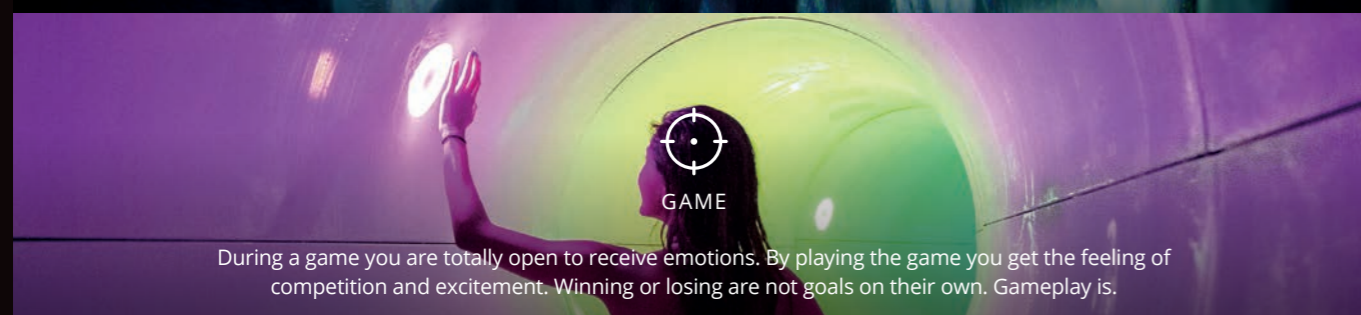

TOUCH

To touch or to be touched, that is the question. We use this important sense as soon as we are born. In the end we have to do both. It's a life vain and a way to live your life.

EXPERIENCE

"Let me experience something and I will never forget." This is a saying of one of our greatest heroes ever. Collecting experiences and memories is better than collecting gold and last a lifetime.

GAME

During a game you are totally open to receive emotions. By playing the game you get the feeling of competition and excitement. Winning or losing are not goals on their own. Gameplay is.

Develop together with us a unique and exclusive partnership. We provide strength. We add value to your water slides. And to your business. Our focus is innovation.

Always something new.

IF  
YOU CAN  
IMAGINE IT  
WE CAN  
BUILD IT

Enjoy and experience. FUN. Exceeding expectations, creating memories that last. We believe that it's all about that. We are iSlide. Each day we get out of bed to add more FUN in your water slides, swimming pools and water parks.

**At iSlide we turn your water slide into an exhilarating interactive experience**

We aren't just a player on the market, we created the market. What started as an idea years ago has turned into the iSlide experience today. We are at the forefront and we are here to stay.

We believe in quality in-house produced components, combined with in-house programmed content. Everything under one roof, from start to finish.

The wishes of our clients push us to innovate and create a next level experience for each water slide.

# FEATURES

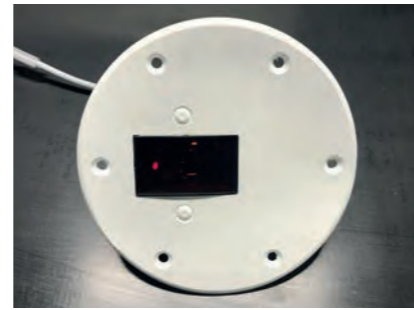

## BASICS

**ISLIDE CONTROLLER**  
All products are controlled by iSlide's Control System.

**TRAFFIC LIGHT COUNTDOWN**  
Sensor steered, red and green light, counting down.

**SENSORS**  
Trigger different effects in the water slide.

## EXTENSION ON BASICS

**TOUCHSCREEN**  
Your guests can choose from different themes in the water slide. All effects adapt to the chosen theme.

**SAFETY INDICATION SYSTEM**  
Monitor specific conditions of the slide. If one of these conditions is not ok, the traffic light will turn blue.

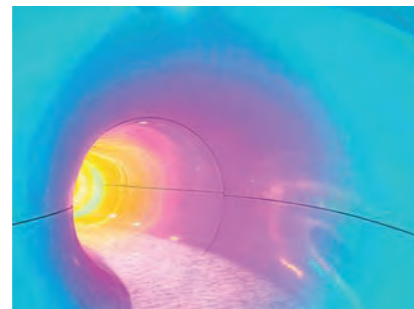

**CCTV**  
To assist your employees monitoring the safety of your guests, CCTV camera's can be used to view footage in the slide or water park.

## ISLIDE EFFECTS

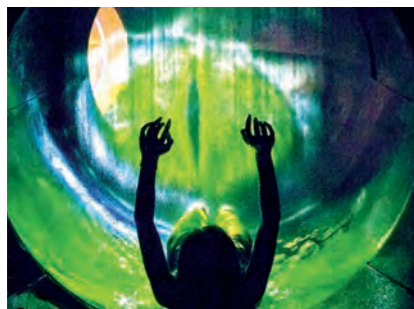

**SOUND**  
Music and sound effects matching the selected theme.

**COLORMAGIC SPOTS**  
Illuminate the inside of the slide in millions of different colors.

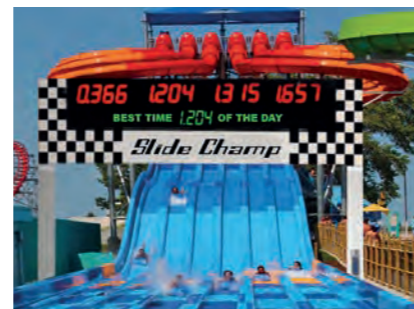

**SPACE RINGS**  
Create various colorfull effects with Space Rings or ColorTwister Rings.

**WATER CURTAIN WITH VIDEO PROJECTION**  
Riders slide straight through a waterscreen with moving images projected onto it.

**AQUASMASH TOUCHPADS**  
Riders try to hit as many luminous touchpads as possible while they go down the water slide.

**SLIDECHAMP**  
This scoreboard displays the riders time, speed and best time of the day.

## GET STARTED

Upgrading your water slide goes beyond the mere installation of special effects. The special effects are means to an end; turning your water slide into a next level experience.

Through research, experience and innovation, we have fine-tuned our products to create fully functional systems that breath quality and excitement.

By evolving several branches of our prodcuts, we offer systems that serve multiple purposes which will keep your customers coming back time and again. Besides that they will bring their friends and family with them.

iSlide doesn't limit itself to new water slides; both new and existing water slides can be upgraded.

The system is expandable at any time so if you already have an iSlide system, you can always upgrade it further with our newest products. Your water slide will never be the same!

Besides our standard products we are well known for thinking out of the box, making custom products for any waterpark or swimming pools who desires. This doesn't only apply to effects on the inside or outside of the water slide but also to buildings, walls or even complete custom lighting and sound plans throughout the entire building.

## WHAT OUR CLIENTS SAY

"We love our iSlide system. We were able to create an entire marketing campaign around a brand new experience for 10% of the cost of a new slide. Attendance has increased 24% since we added the iSlide features. The variety of having different themes and programs in the slide keeps the guests coming back for more."

*John P. Gannon; General Manager*

"The iSlide system was a definite hit for our guests. Interest in the ride nearly doubled over the course of the season as guests HAD to try all eight different song/light choices. We had no issues with the system once installed and we look forward to trouble-free operation in the future!"

*Eric Bertch; General Manager / Owner*

"iSlide is a reliable partner for us, characterized by innovation, flexibility and high service standards. The services they have provided to us are a major added value for our operations. Besides the growth of visitor number, it has led to a sustainable implementation of elements that are continuously adapted to different target groups."

*Ton Bothoff; CEO*
